

Apron Chronicles

A PATCHWORK OF AMERICAN RECOLLECTIONS

Apron Chronicles: A Patchwork of American Recollections is America's most nostalgic, thought provoking and generational-friendly traveling exhibition. Touring since 2004, *Apron Chronicles* presents the American experience through 46 photographs, accompanying text in story form and 100 vintage aprons. Utilizing the apron as a symbol immediately recognized by everyone, *Apron Chronicles* explores the people behind the aprons and is ultimately more about life than fabric. The exhibit's diverse storytellers include a 111-year-old mother and her only child, a Holocaust survivor, a biology professor from Mali, Africa, and a preteen and her grandmother.

Best-selling author EllynAnne Geisel's stories and vintage apron collection give voice to the exhibit, with award-winning photographer Kristina Loggia preserving the storytellers' images in an environmental style that complements the unadorned honesty of their recollections.

Apron Chronicles national recognition includes Time magazine, the New York Times, CBS Sunday Morning and NPR's Weekend Edition.
